MINDSET MATTERS

to Everyone!

Join the Conversation!

Are you interested in enhancing your own life and shaping your child's future? Would you like to unlock more potential as a parent, grandparent, or coach; in business; or in family relationships? Have you ever wondered why some people are more open to possibilities, growth, and change? If you answered "yes" to any of these questions, you may want to join our community conversation!

Our community conversation will feature the book *Mindset: The New Psychology of Success* by Dr. Carol S. Dweck from Stanford University. In this book, Dr. Dweck explains why it's not just our abilities and talent that bring us success - but whether we approach our goals with a fixed or growth mindset. With the right mindset, we can motivate our children and help them improve in school, as well as reach our own goals - personal and professional.

As a participant, you are able to choose from a wide range of community activities including face-to-face and online discussions, conversations in our schools, and opportunities for student participation. Follow us on Twitter and Facebook or explore other resources. Whether you participate a little or a lot, every activity will provide a new opportunity for growth.

Mindset books will be available by September 3rd at these places: all SM Schools, SM Health Department, SM City Hall, SM Public Library, and Sorce Martial Arts. A donation to offset the book's cost is appreciated. Once you pick up your book, you will be contacted with further opportunities as the conversations begin!
